Senior Product Designer with 18+ years shaping enterprise SaaS platforms, now building the AI systems — conversational agents, automation workflows, dynamic AI content interfaces — that power them. Ships production AI products end-to-end: design, prompt engineering, and API integration, not just mockups.

SELECTED WORK

Ignite & Zylo — BuzzBoard (AI SaaS)

- Designed UI for an AI lead-scoring platform and a multi-agent content fulfillment system serving thousands of SMB accounts — solving for structurally unpredictable, dynamically generated AI content across every screen.

Website + AI Chat Widget — Elite Marketing Events

- Built the full company website in React/Vite; designed and shipped a Gemini-powered chat widget on Supabase Edge Functions.

AI Booking Chatbot — Yashoda Hospitals

- Designed and built a trilingual (English/Hindi/Telugu) appointment-booking assistant on n8n + Gemini AI, with emergency detection and double-booking prevention.

ProspectPilot — Personal project

- Built a B2B lead-scraping and website-audit engine combining Gemini Vision analysis with automated, observation-first cold email drafting.

Product Catalogue Website — Jaiswal Brothers

- Built a 45-product catalogue site in React/Vite for a Hyderabad ice cream supplies dealer, routing every enquiry into WhatsApp instead of a traditional cart.

EXPERIENCE

Lead Product UI Designer & Illustrator — BuzzBoard India Pvt. Ltd.

2017 – 2026

- Led UX/UI for enterprise SaaS products, Chrome Extensions and Gmail Add-ons; designed and built an AI Voice Receptionist with automated appointment scheduling. Sparkle Award recipient.

UI/UX Lead Designer — G11n Inc. / EvamLabs Tech Solutions

2015 – 2017

- Led design across TalentPro, eCertify and employee onboarding platforms; owned UI consistency and quality across the product suite.

UI / Web Designer — Ybrant Digital Ltd. (Lycos / Brightcom)

2007 – 2014

- Designed corporate websites, portals and digital marketing assets across large-scale web applications.
